

SUMMER 2011

EcoSolar Spots

NEWS AND INNOVATION FROM ECOSOLAR, LEADERS IN SOLAR WATER HEATING

Christmas & New Year Closedown—Our offices will be closed from 12.00 noon on Thursday 22nd December and will reopen on Monday 16th January 2012.

Solar collectors on the Administration block at Papamoa High school

EECA Grants Scheme—EcoSolar system Energy Star compliant—Many of the EcoSolar two collector systems are eligible for and are compliant with the EECA Energy Star rating. This means that when installed by an accredited installer, the client is able to obtain a \$1,000 grant. Smaller systems are eligible for a \$500 grant. See the EECA website or contact our sales staff for further details.

Industry Leading Solar Design Service the design service offered by Energy Conscious Design has proven popular this year, clients have included; Engineers, Architects as well as end users, contact our Engineering Group for more details.

We thank all our customers and suppliers for their assistance during 2011, wish all a Merry Xmas and a Happy New Year and look forward to seeing you all in the New Year.

Energy Conscious Design and EcoSolar have been involved in some great projects this year including;

- Willis Central—the New Telecom headquarters in Wellington. This EcoSolar installation undertaken with John Leen Plumbing offered some unique challenges. Hard work and attention to detail in both the design and installation phases has resulted in a demonstration system which is performing to high standards.
- Tauranga Indoor Sports and Exhibition Centre—an EcoSolar solar pre-heat system was installed in this great new venue for Tauranga.
- BLENZ—an EcoSolar solar preheat system was installed in this new school for the blind in Manurewa.
- There were also some interesting domestic solar water heating installations completed during the year, including the Dunn House in Herne Bay. An extensive solar water heating system was installed with 40m² of solar collectors to heat both the domestic hot water and the swimming pool.

Energy Conscious Design and EcoSolar are currently working on several significant projects including;

- BRANZ— EcoSolar were selected to supply the solar collectors and systems for the new BRANZ buildings in Wellington. Also lookout for SPLASH Monitoring which is being installed in the new BRANZ reception area
- Ohakea—a large EcoSolar solar water heating system providing domestic hot water to this new facility near Palmertson North
- Multiple rehome projects where Energy Conscious Design's industry leading design team have implemented Energy Efficiency measures which include extensive EcoSolar solar water heating systems

SolarMate preplumbed and prewired hot water cylinders Our range of cylinders have been welcomed by Plumbers and Customers alike where they have proven to reduce installations costs. SolarMate cylinders take the hassle out of installing a solar water heating systems with most of the hard work completed for you. Drainback, draindown and Open loop versions are available. Visit one of our showrooms to see how these cylinder can help you.

This year we launched the EcoSun range of pool collectors in NZ. Manufactured by the largest manufacturer of pool collectors in the US, EcoSun are manufactured from superior raw materials, this combined with a patented design results in unmatched performance and superior reliability. Proven reliability over 30 years, EcoSun collectors are the most tested and most trusted pool collector brand, they are also the first and only pool collector tested to NSF-50, don't take risks, choose the best.
